

OGILVY MEDIA

Ogilvy *Orbit*

The Media Buying Records System, explained for Managers.

A read-only tour of the analytics you oversee, with every chart on every screen explained: what it shows, how to read it, and what data drives it.

01

THE MANAGER'S VIEW

Oversight, without the spreadsheets

Orbit gives you a live, read only window into billings and performance across every agency you own.

One console for oversight

As a Manager you do not enter data. You review it, across agencies, the moment it lands.

1

See every account

Read access spans all agencies assigned to you, with billings, pacing and performance in one place.

2

Read the story in charts

Dashboards turn raw schedules into trends, splits and rankings you can act on in a review.

3

Report and export

Pull branded Excel and PDF reports for any agency, client or channel on demand.

What a Manager can reach

You have read access across every agency assigned to you. You cannot edit records, which keeps the numbers you review clean and trustworthy.

Executive Dashboard

Your home: billings and pacing across agencies

Spend Analytics

Deep charts and breakdowns of committed spend

Deep Dashboard

Multi year trends and property performance

Channel Intelligence

Spend and trends for any single channel

Client Dashboard

A per client analytics view for reviews

Branded Excel and PDF exports on demand

Database

The underlying schedule records, read only

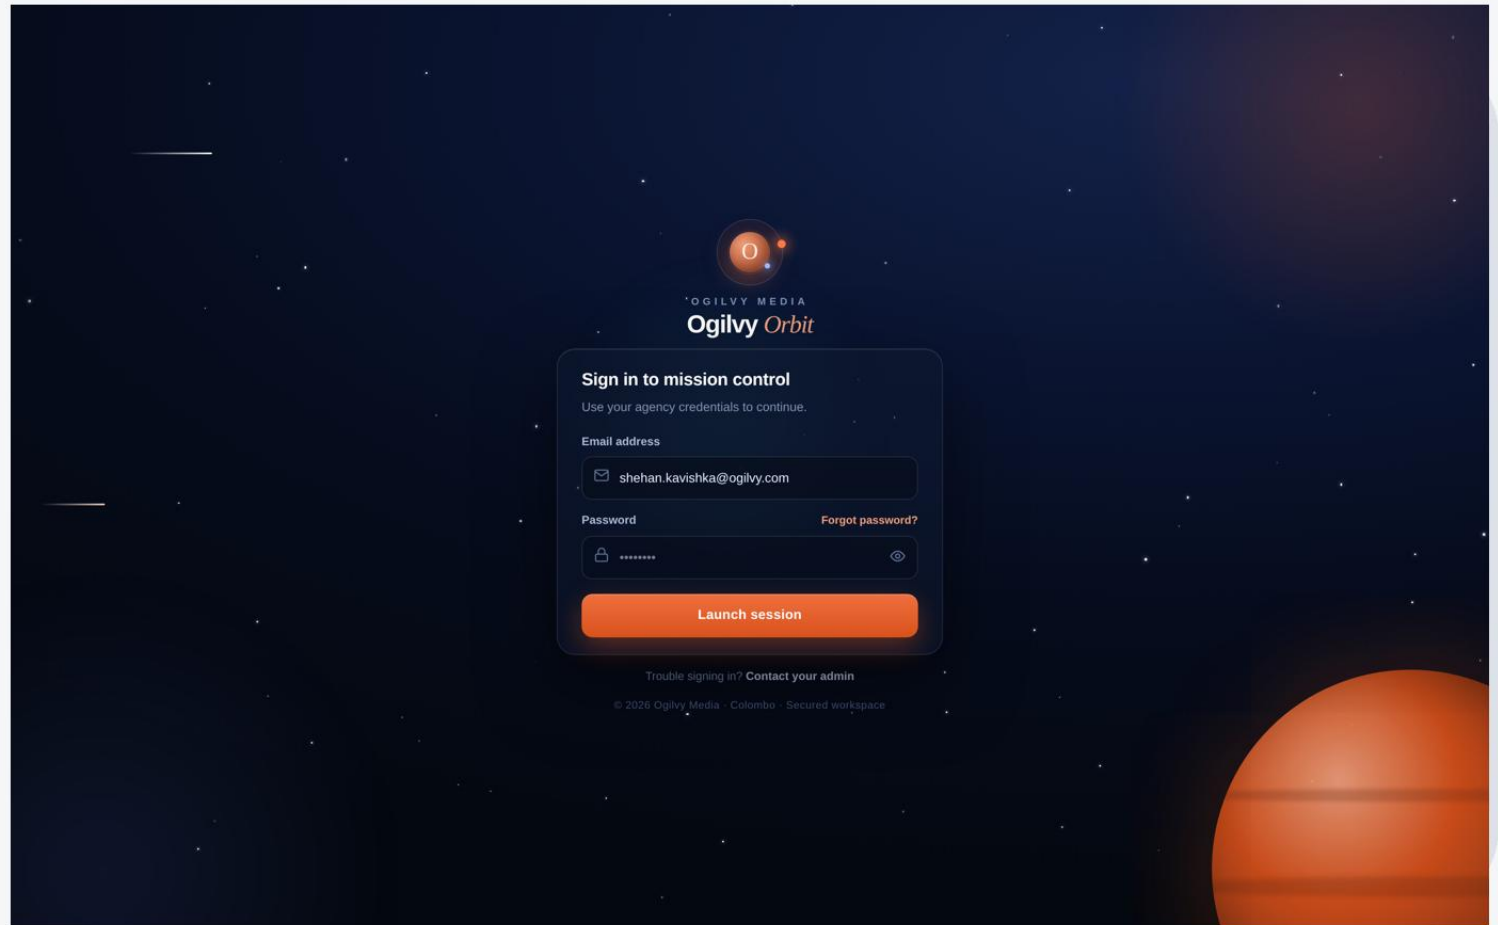

SIGNING IN

Your secure sign in

You sign in with your agency email and a private password. Orbit remembers nothing you should not see.

WHAT YOU CAN DO HERE

- Sign in with your Ogilvy email and password
- Reset a forgotten password from the same screen
- Set a fresh password on your very first sign in
- Read access only, so records stay protected

Tip Your role is read only by design, which keeps every number you review trustworthy.

02

YOUR SCREENS AT A GLANCE

Six screens you will live in

A quick orientation to each screen before we open up every chart on them.

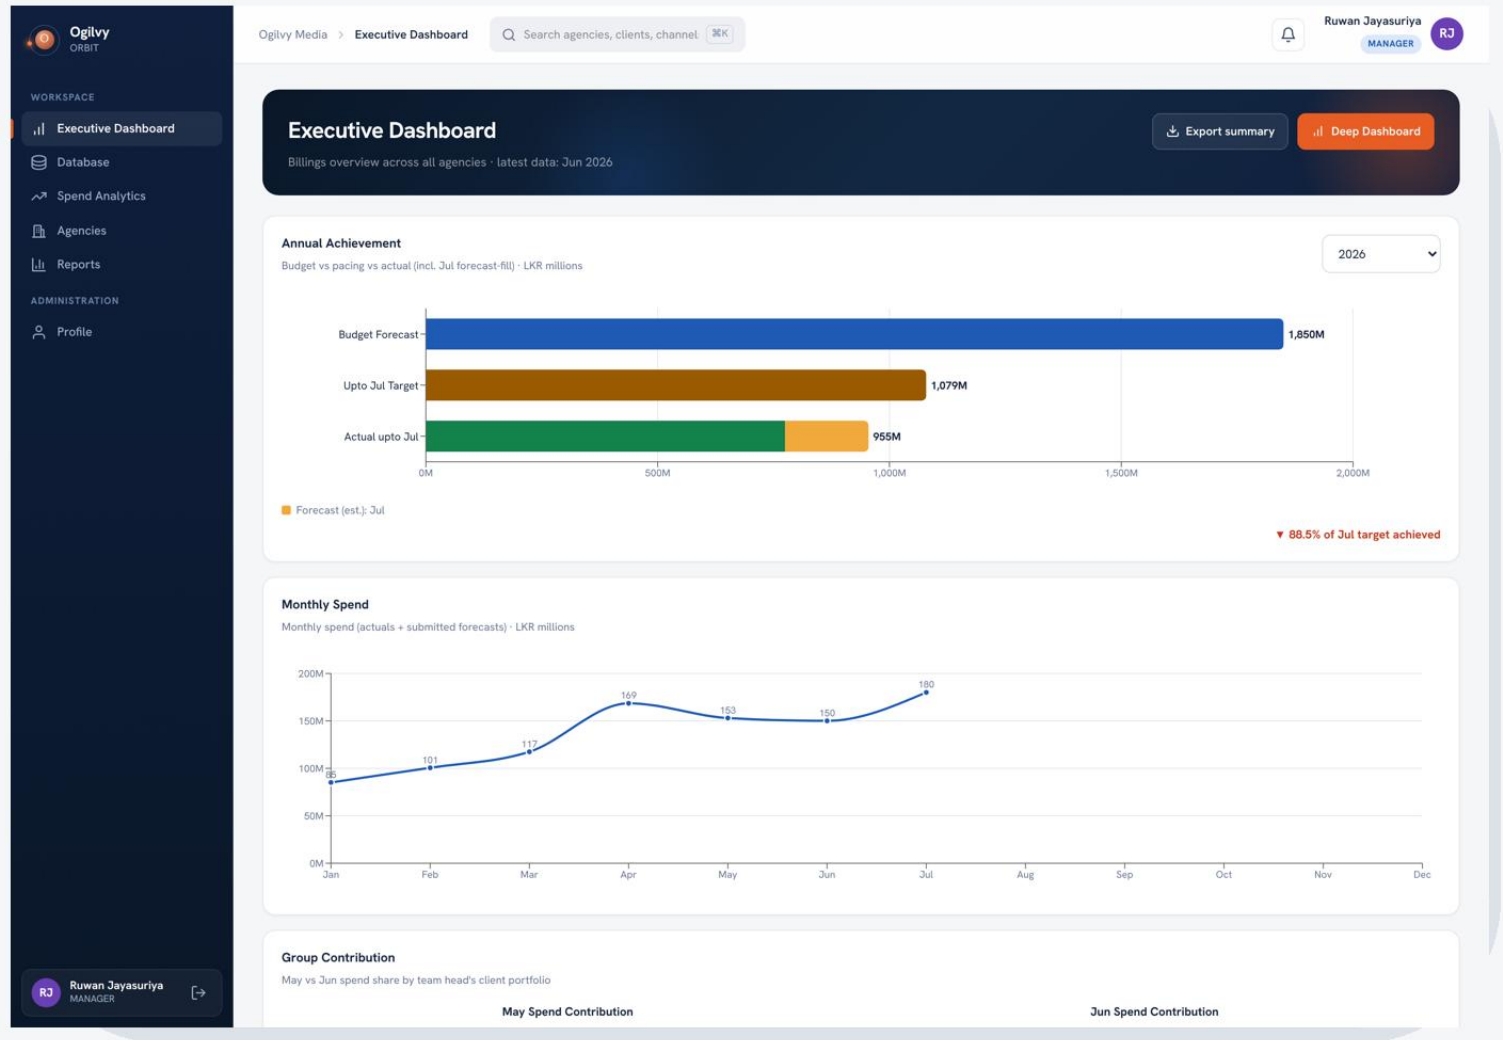

EXECUTIVE DASHBOARD

Executive Dashboard

Your home screen. A billings overview across all agencies, anchored to the latest month with data.

WHAT YOU CAN DO HERE

- Lead with Annual Achievement: budget, pacing, actual
- Follow company spend on the Monthly Spend line
- Compare agencies, mediums and team contribution
- Export a branded summary in one click

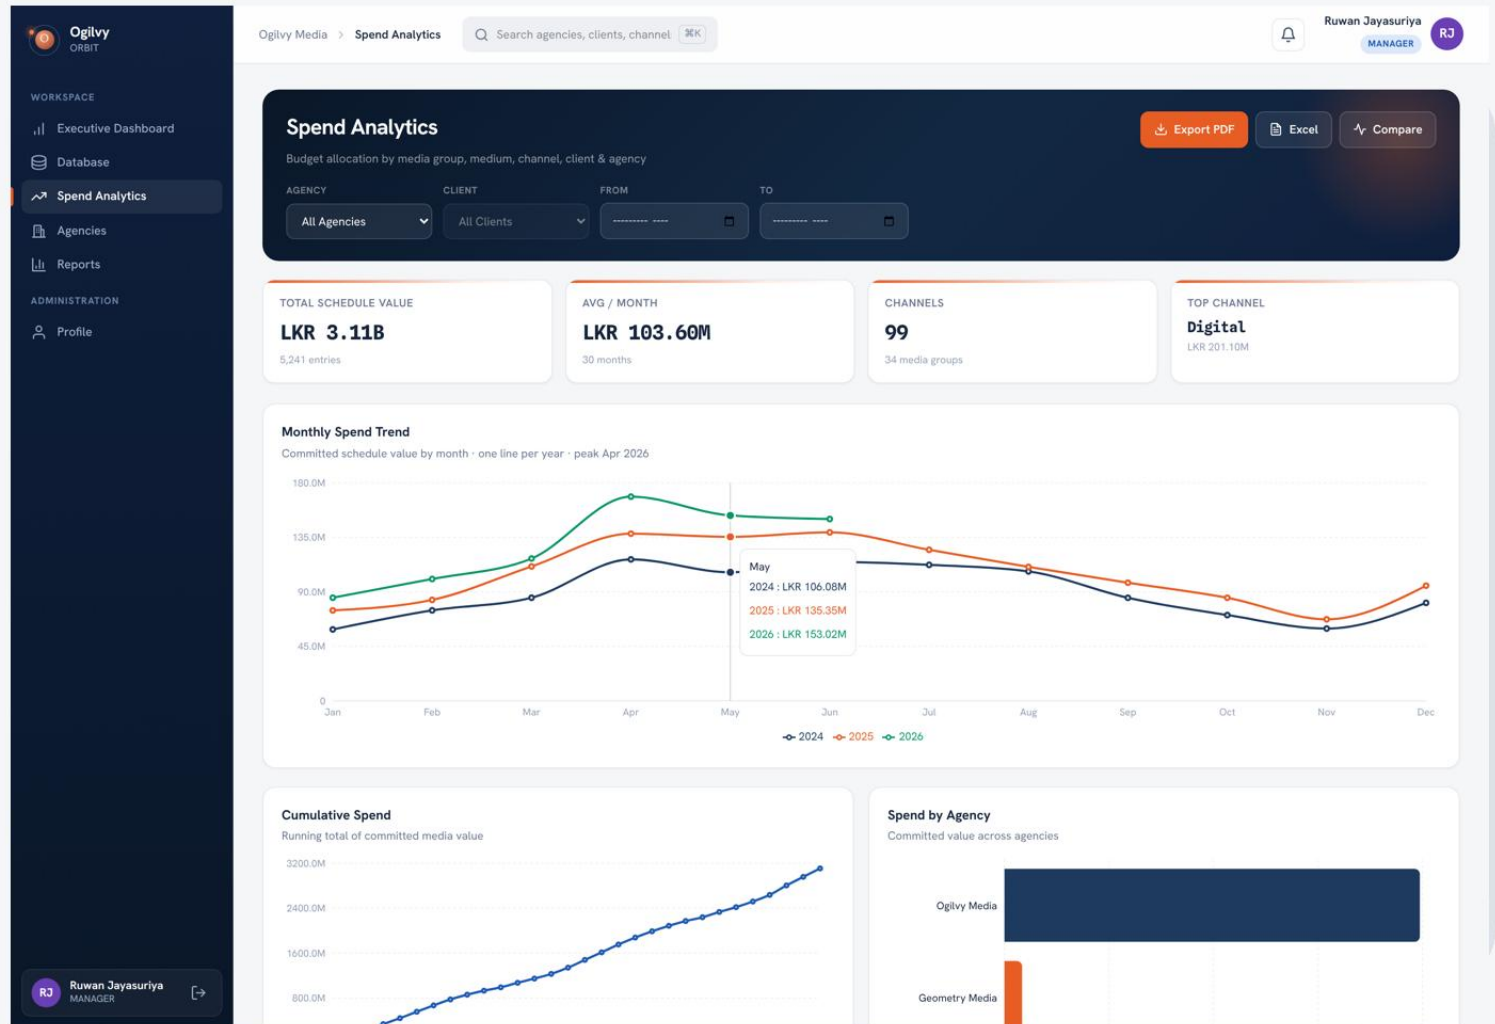

SPEND ANALYTICS

Spend Analytics

The deepest analytics screen. Filter by agency, client and date, then read spend from every angle.

WHAT YOU CAN DO HERE

- Twelve charts covering trend, mix, tenure and more
- Filter by agency, client and month range
- Cross filter the channel views from the medium donut
- Export the whole view to Excel or PDF

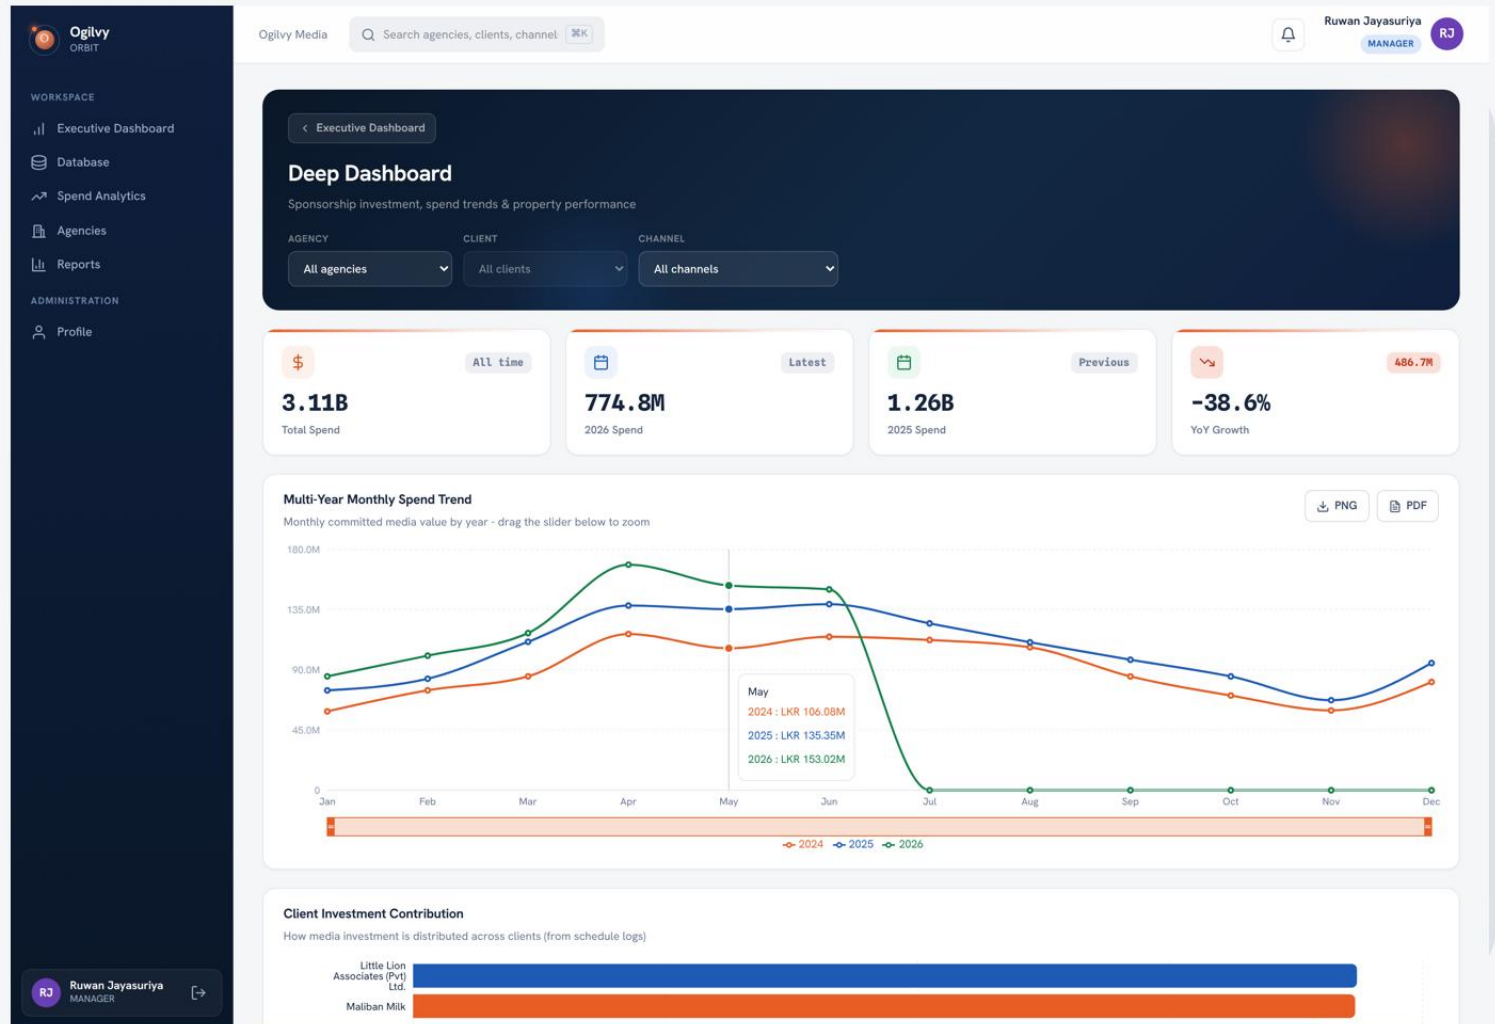

Deep Dashboard

A drill down for multi year trends, client contribution and property level performance.

WHAT YOU CAN DO HERE

- Overlay several years on one trend, with a zoom brush
- Rank clients and channels by their contribution
- Sort a property table, including bonus yield
- Export the detail to Excel or PDF

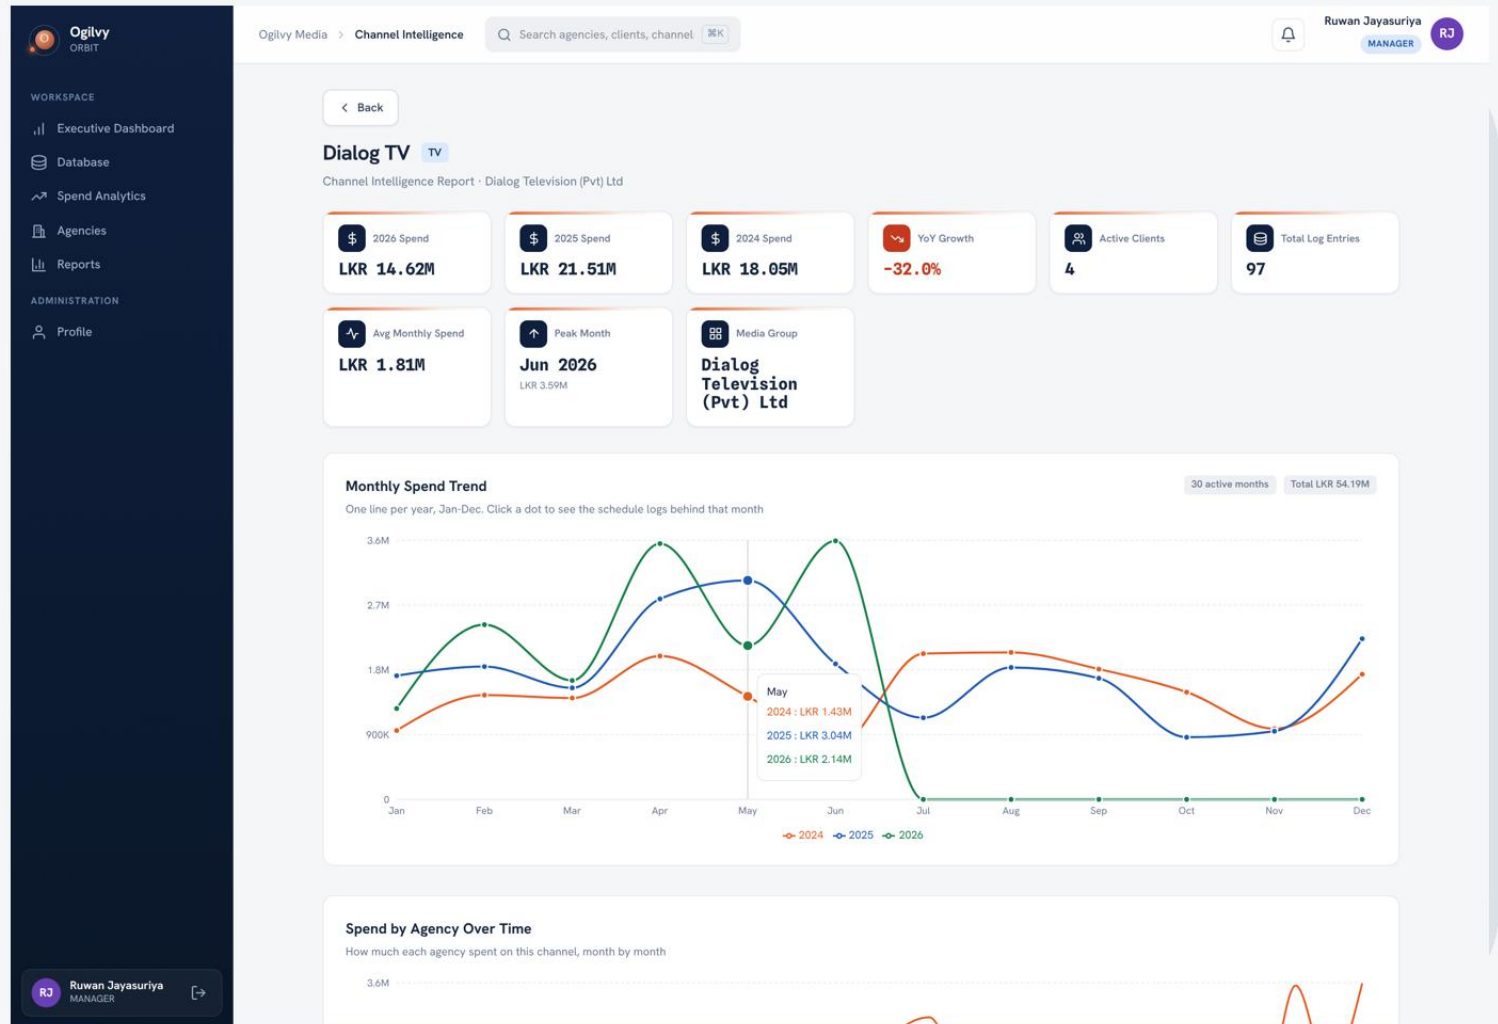

CHANNEL INTELLIGENCE

Channel Intelligence

A full read on a single channel across every client and agency, so you review from evidence.

WHAT YOU CAN DO HERE

- Read spend, growth and the peak month per channel
- Trace any month back to the schedules behind it
- See which agencies drive the channel over time
- Spot how concentrated the channel's clients are

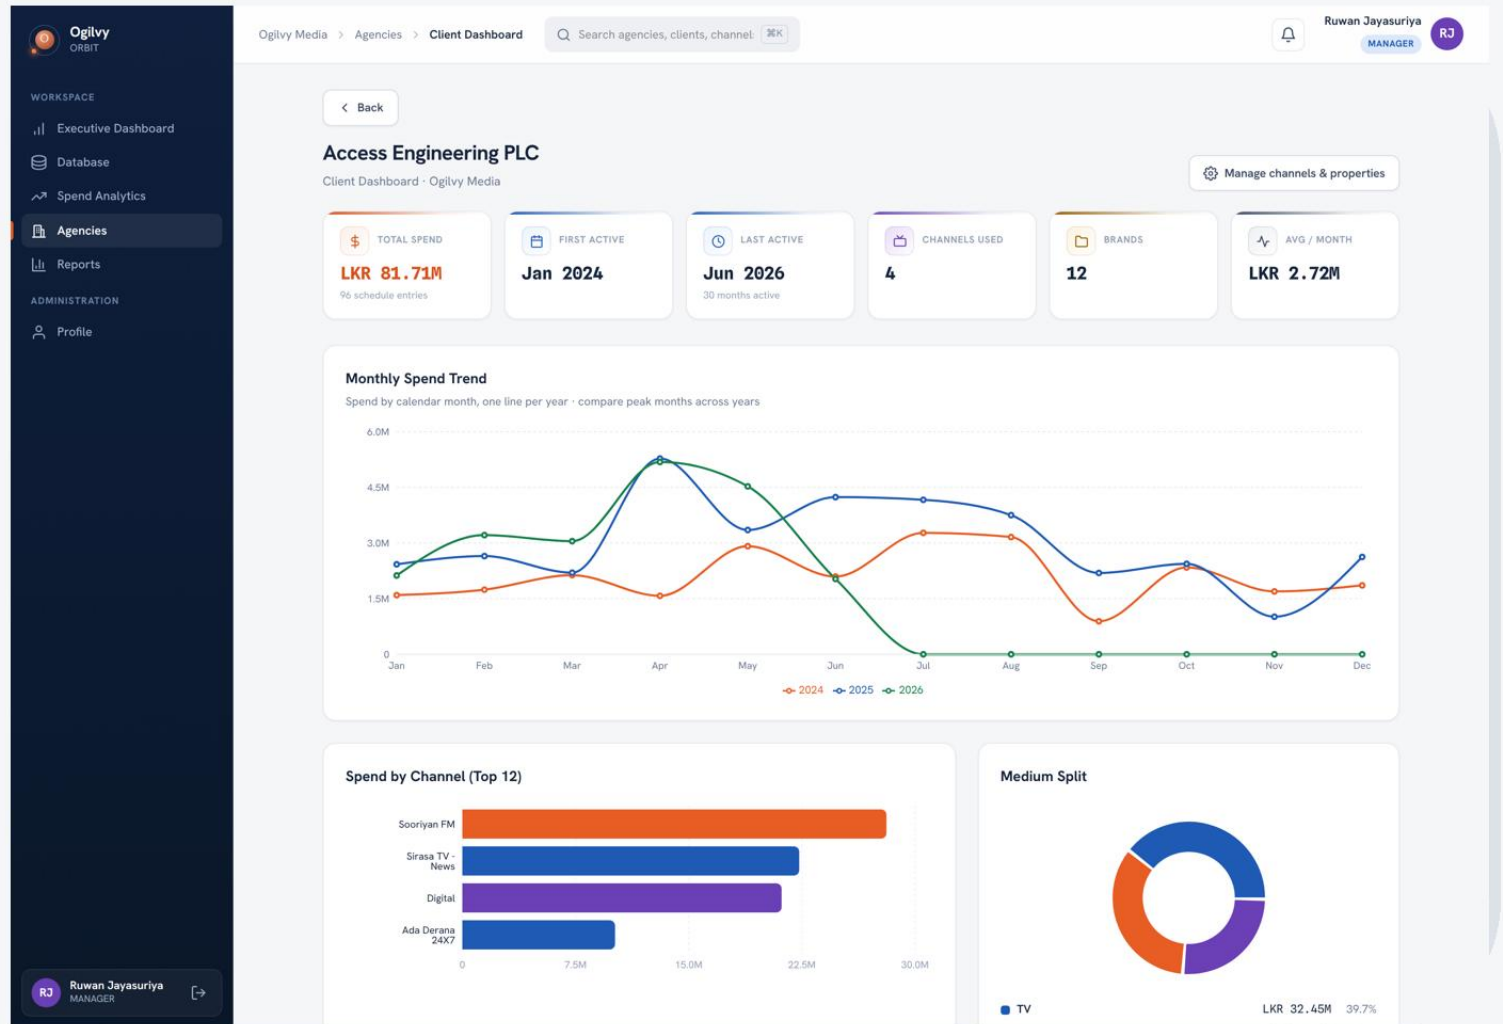

CLIENT DASHBOARD

Client Dashboard

A focused analytics view for one client, so you can walk into any client review prepared.

WHAT YOU CAN DO HERE

- See the client's spend trend across years
- Read their channel and medium mix at a glance
- Understand where a client is growing or slowing

REPORTS

Reports

Generate branded, shareable reports for any agency, client or channel, in Excel or PDF.

WHAT YOU CAN DO HERE

- Choose an agency, client or channel to report on
- Include rate history and property timelines
- Download as branded Excel or PDF
- Share a clean document with stakeholders

03

EVERY CHART, EXPLAINED

Reading every chart, one at a time

For each chart: what it shows, how to read it, and the data that drives it. Grouped by the screen it lives on.

Annual Achievement

WHAT IT SHOWS

The year's budget target, the target you should have reached by this month, and actual billings so far, all in LKR millions.

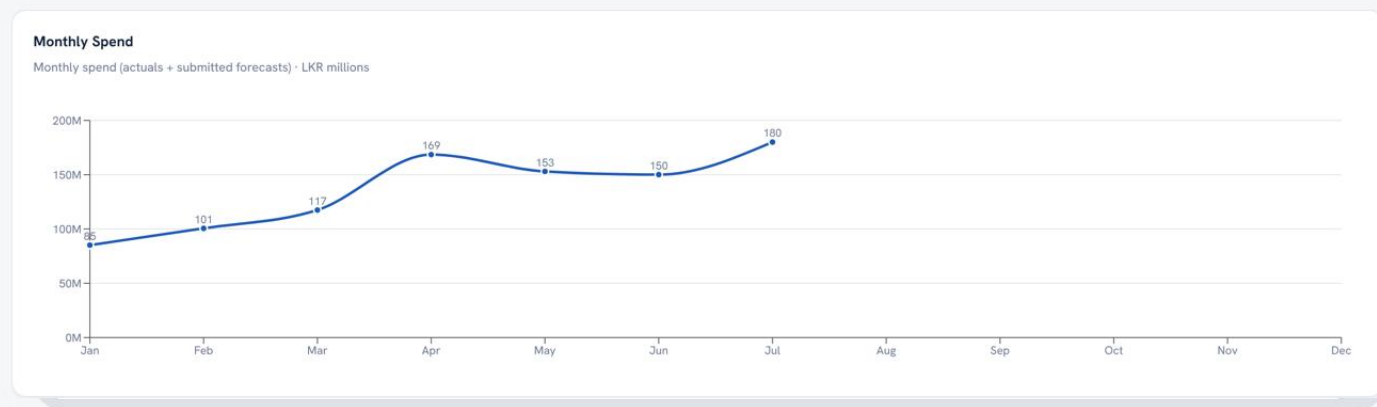

HOW TO READ IT

Compare the green Actual bar against the amber pacing target. The chip reads the percent of the pacing target achieved. The lighter tip on Actual is forecast fill for months not yet closed.

WHAT DRIVES IT

The Annual Target set by admins, confirmed schedule billings, and Group Head forecasts for the gap month.

Monthly Spend

WHAT IT SHOWS

Company wide spend for each month of the selected year, with the coming month shown as a forecast point.

HOW TO READ IT

Follow the line for pace and seasonality. The final point is a forecast until real schedules arrive, then it switches to actual on its own.

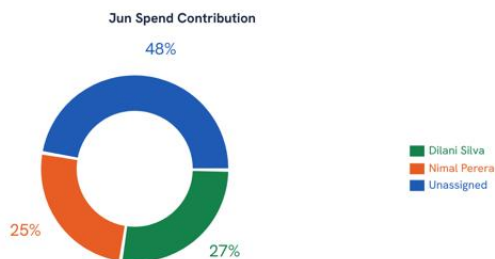

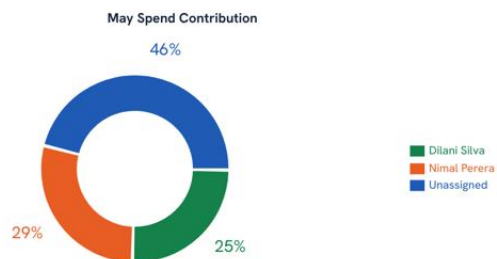

WHAT DRIVES IT

Confirmed schedule billings, plus Group Head forecasts for the upcoming month.

Group Contribution

Group Contribution

May vs Jun spend share by team head's client portfolio

WHAT IT SHOWS

Two donuts, one per recent month, each split into every team's share of that month's total team spend.

HOW TO READ IT

Each slice is a team, labelled by its head. Compare the two donuts to see whose share grew or shrank month to month.

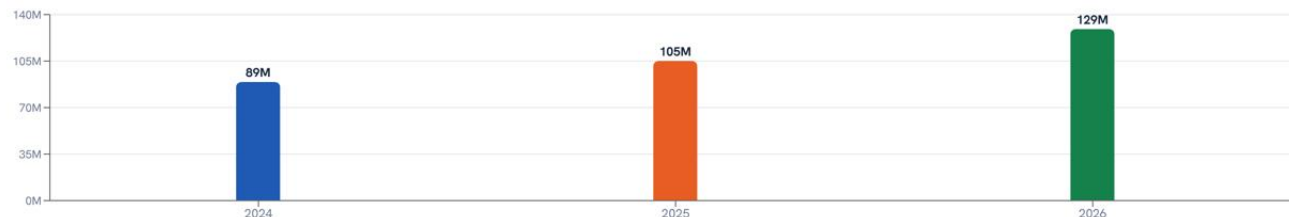

WHAT DRIVES IT

Schedule billings grouped by the team that owns each client, for the latest two months with data.

Monthly Avg

Monthly Avg

Average monthly spend per calendar year, all clients · LKR millions

WHAT IT SHOWS

The average monthly spend for each calendar year, one bar per year.

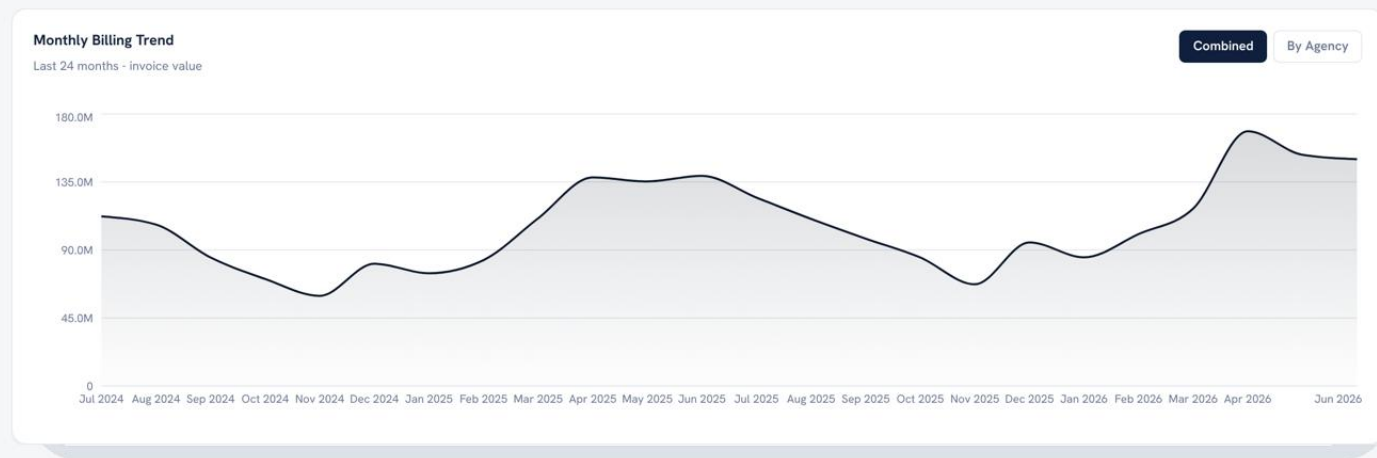

HOW TO READ IT

A taller bar is a higher run rate that year. A part year divides by only the months that have data, so partial years stay comparable.

WHAT DRIVES IT

Each year's total billings divided by its number of months with data.

Monthly Billing Trend

WHAT IT SHOWS

Invoice value over the last 24 months, shown as one combined line or split by agency.

HOW TO READ IT

Toggle Combined or By Agency at the top right. Look for sustained rises, dips and seasonal peaks.

WHAT DRIVES IT

Schedule billings totalled by invoice month.

Agency Comparison

WHAT IT SHOWS

Monthly billings per agency over the last 12 months, with a summary card for each agency below.

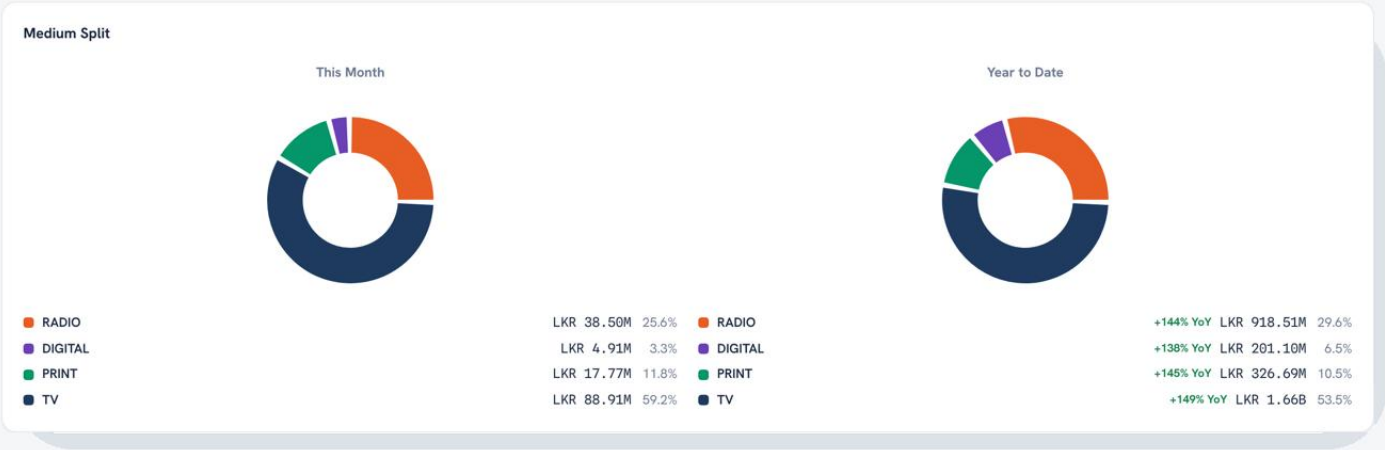

HOW TO READ IT

Compare bar heights month by month to see which agency paces ahead. The cards read each agency's totals and growth.

WHAT DRIVES IT

Schedule billings grouped by agency.

Medium Split

WHAT IT SHOWS

Two donuts, this month and year to date, each split by medium with the value and share per medium.

HOW TO READ IT

The ring shows where money goes by channel type. Compare this month against the year to spot a shift toward or away from a medium.

WHAT DRIVES IT

Schedule billings grouped by medium.

Monthly Spend Trend

WHAT IT SHOWS

One line per year on a fixed Jan to Dec axis, so the years overlay for easy comparison.

HOW TO READ IT

Read vertically to compare the same month across years. A higher line means a stronger year at that point.

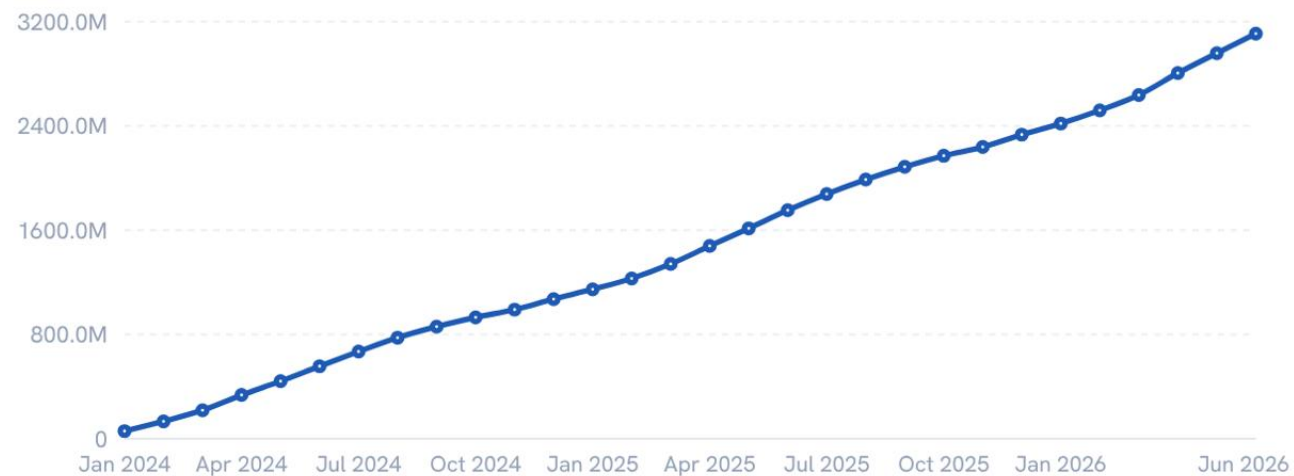

WHAT DRIVES IT

Committed schedule value by month, pivoted into one series per year.

Cumulative Spend

Cumulative Spend

Running total of committed media value

WHAT IT SHOWS

The running total of committed media value building up across the period.

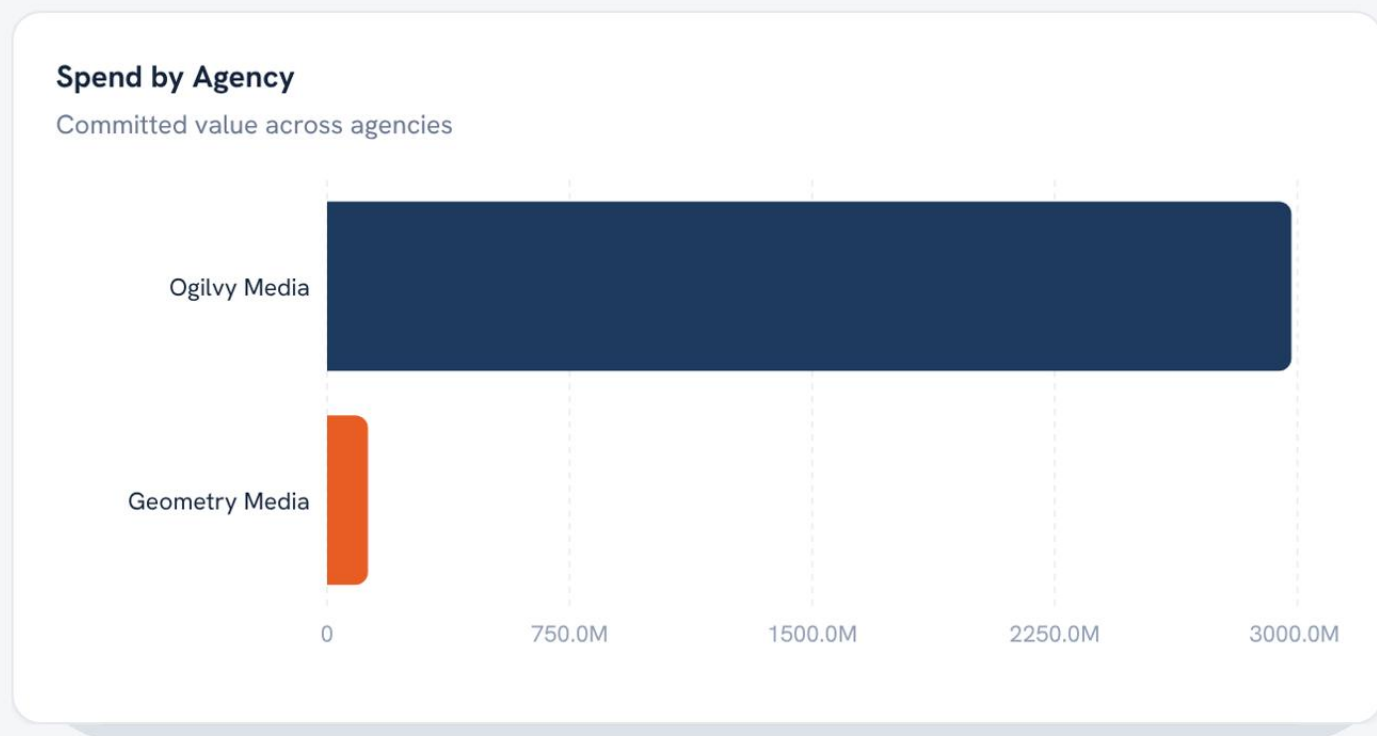

HOW TO READ IT

A steeper slope means faster spending. Flat stretches are quiet months.

WHAT DRIVES IT

Schedule value accumulated month by month.

Spend by Agency

WHAT IT SHOWS

Total committed value per agency, as horizontal bars.

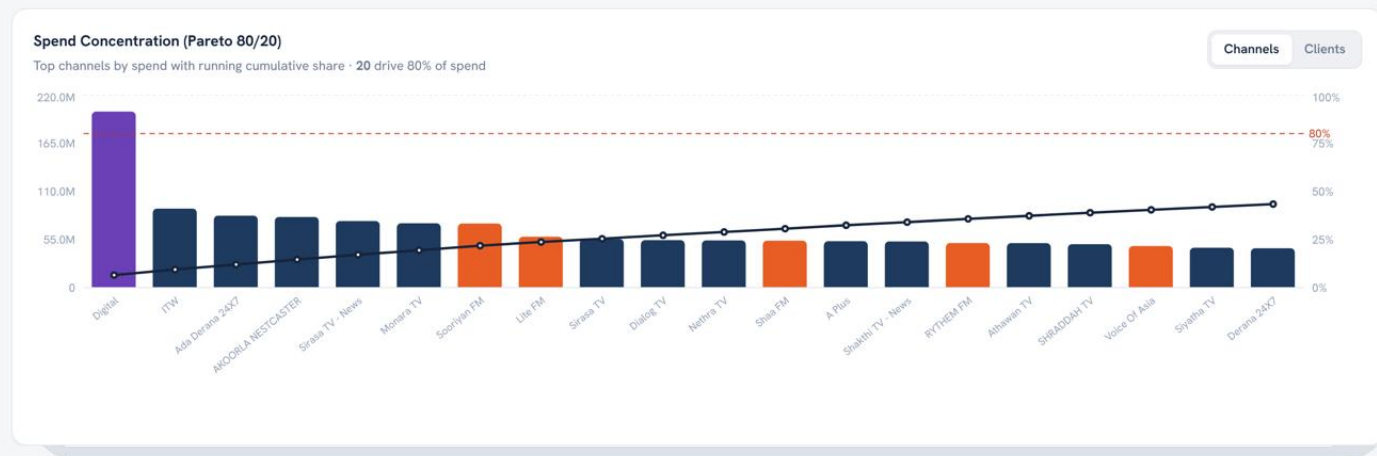

HOW TO READ IT

The longest bar is the biggest agency by spend. It sizes each agency at a glance.

WHAT DRIVES IT

Schedule value grouped by agency across the filtered period.

Spend Concentration (Pareto)

WHAT IT SHOWS

Channels ranked by spend as bars, with a cumulative percentage line and an 80 percent reference line.

HOW TO READ IT

Where the line crosses 80 percent tells you how few channels make up most of the spend.

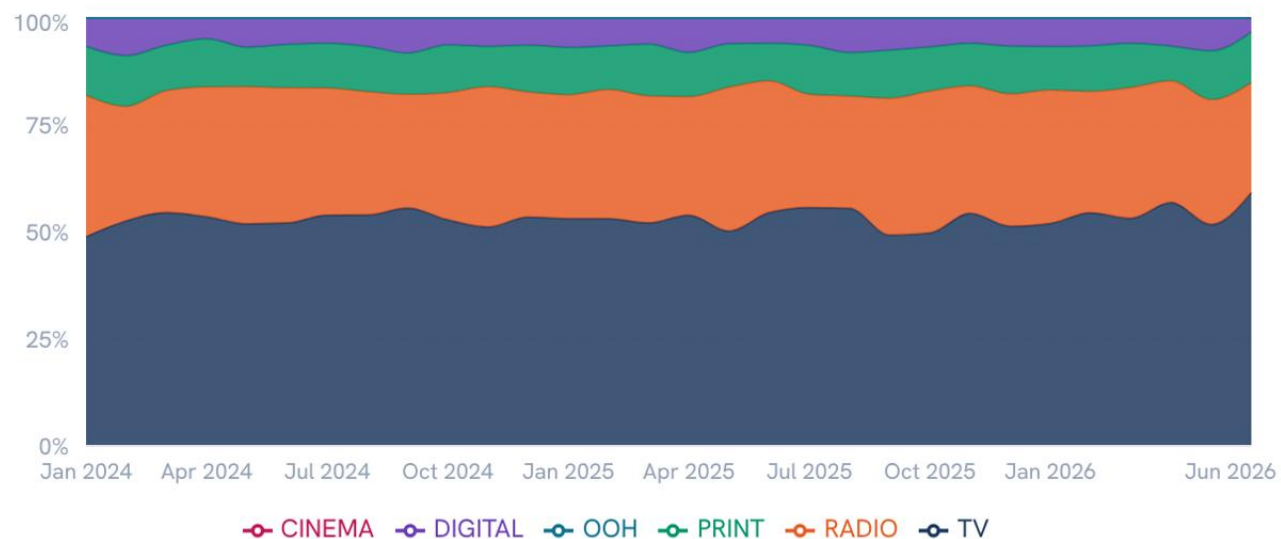

WHAT DRIVES IT

Per channel spend, sorted high to low, with a running cumulative share.

Medium Mix Shift

Medium Mix Shift

TV / Radio / Print share of spend, month by month

WHAT IT SHOWS

A 100 percent stacked area showing each medium's share of spend, month by month.

HOW TO READ IT

Each band is a medium. A widening band means that medium is taking a larger share over time.

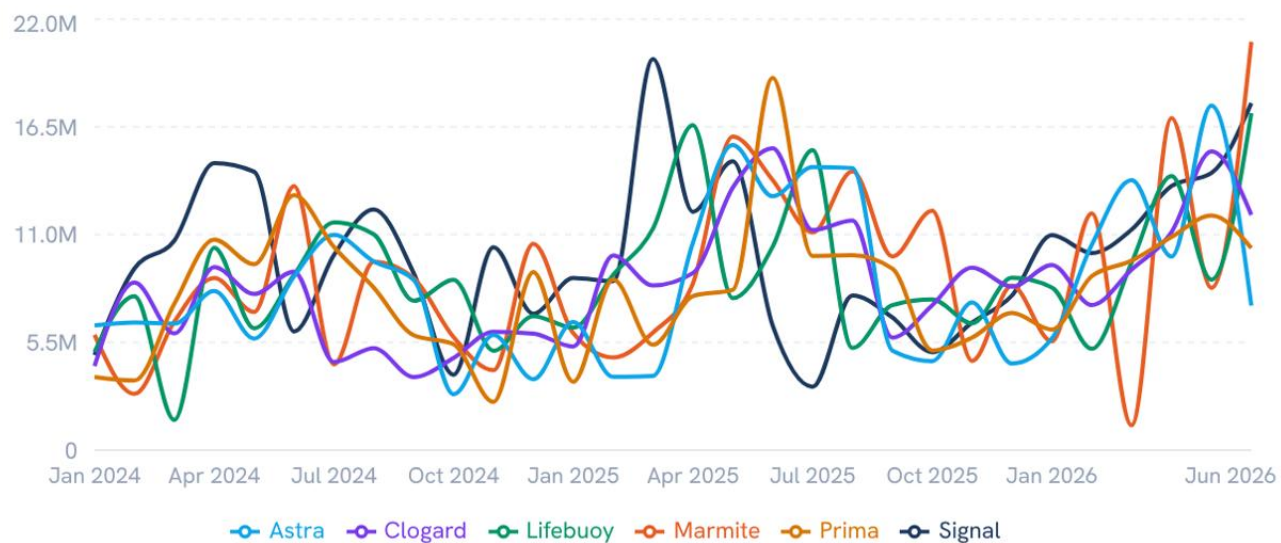

WHAT DRIVES IT

Monthly spend by medium, normalised to 100 percent.

Brand Spend Trend

Brand Spend Trend

Monthly spend for the top 6 brands

WHAT IT SHOWS

Monthly spend for the top brands, one line each.

HOW TO READ IT

Track a brand's line for momentum. Crossing lines show one brand overtaking another.

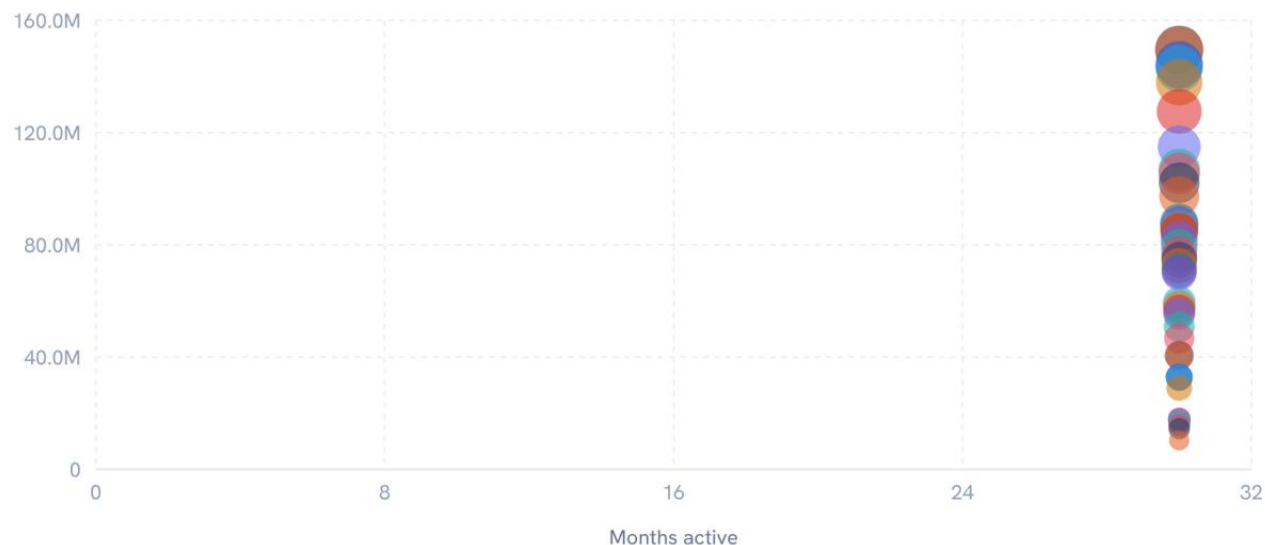

WHAT DRIVES IT

Schedule billings that carry a brand name, for the leading brands.

Client Tenure & Value

Client Tenure & Value

Months active vs. total spend · bubble size = avg monthly spend

WHAT IT SHOWS

One bubble per client, plotting months active against total spend, with bubble size for average monthly spend.

HOW TO READ IT

Top right is a long standing, high value client. A larger bubble spends more heavily each month.

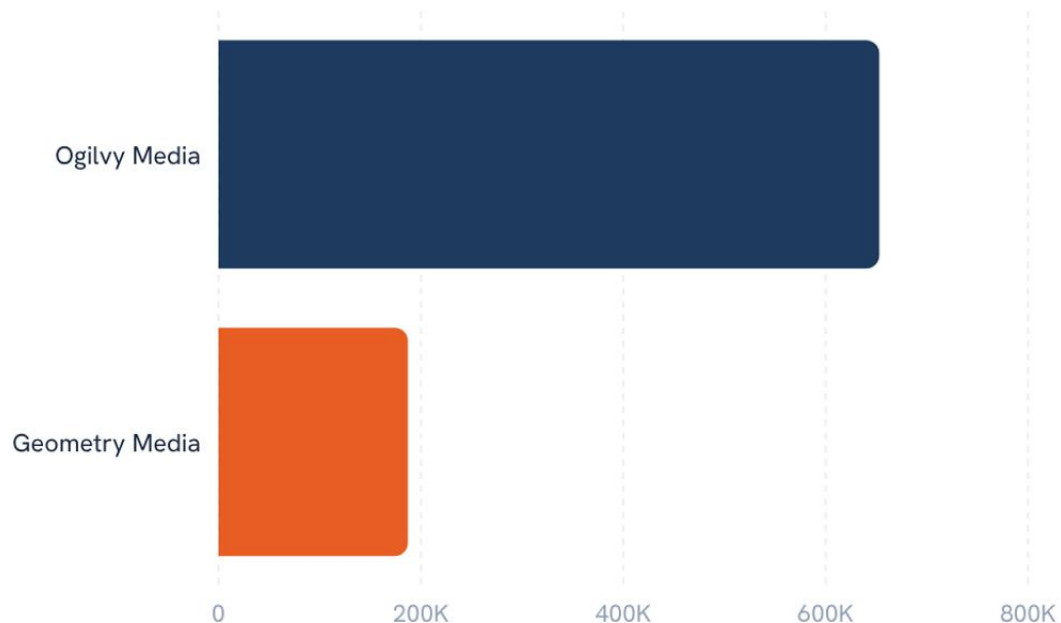

WHAT DRIVES IT

Each client's active span, total spend and monthly average.

Agency Efficiency

Agency Efficiency

Average spend per schedule entry

WHAT IT SHOWS

Average spend per schedule entry for each agency.

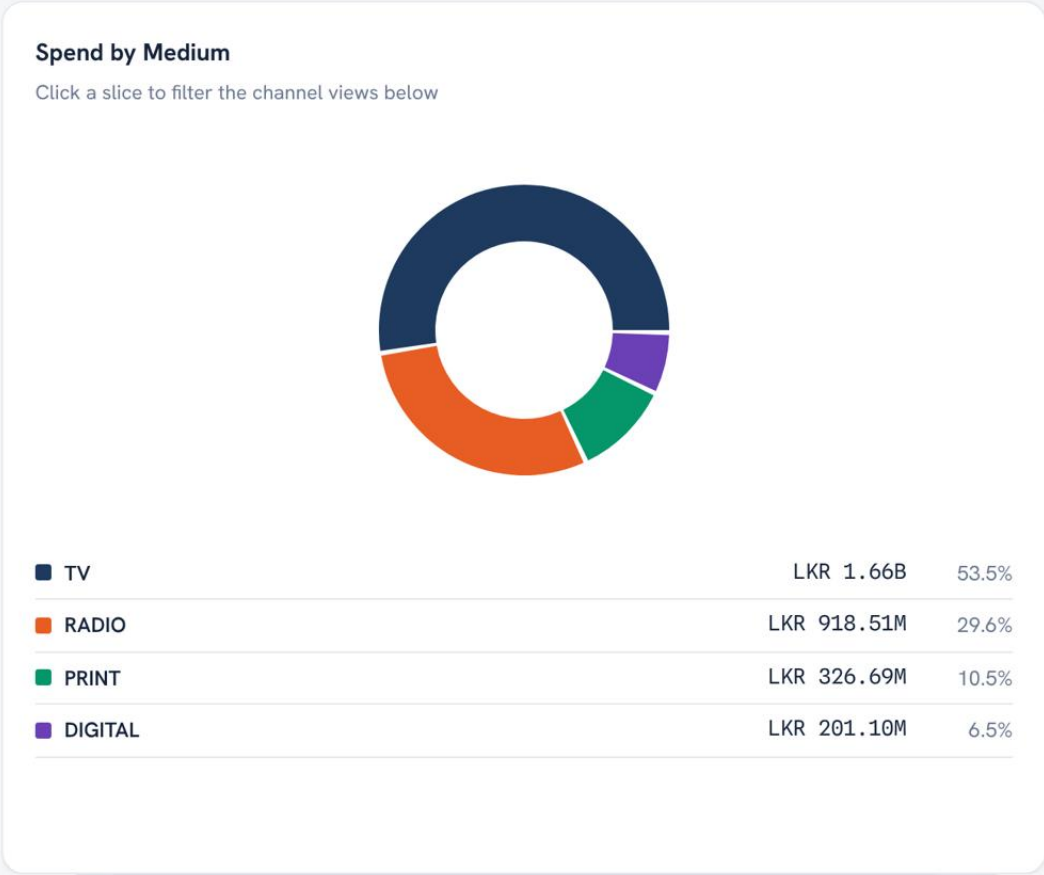

HOW TO READ IT

A longer bar means each logged line carries more value on average, a rough read on deal size.

WHAT DRIVES IT

Agency total spend divided by its number of schedule entries.

Spend by Medium

WHAT IT SHOWS

A donut of total spend split by medium, with the value and share of each.

HOW TO READ IT

Click a slice to filter the channel views below it. The ring shows the balance across channel types.

WHAT DRIVES IT

Schedule value grouped by medium.

Spend by Media Group

Spend by Media Group

■ Power House Limited (1074)	LKR 728.75M	23.4%
■ EAP Broadcasting Company Limited (465)	LKR 227.59M	7.3%
■ Asia Broadcasting Corporation (Pvt) Ltd (237)	LKR 193.68M	6.2%
■ MTV Channel (Pvt) LTD (267)	LKR 168.10M	5.4%
■ Voice of Asia Network (Pvt) Ltd (280)	LKR 155.56M	5.0%
■ Wijeya Newspapers (Pvt) Ltd. (325)	LKR 154.14M	5.0%

WHAT IT SHOWS

A donut of spend split by media group, the broadcaster or publisher behind the channels.

HOW TO READ IT

The largest slice is your biggest media owner relationship by value.

WHAT DRIVES IT

Schedule value grouped by media group.

Top Clients by Spend

WHAT IT SHOWS

Clients ranked by committed spend, as horizontal bars.

HOW TO READ IT

The longest bars are your largest accounts. Hover any bar for the exact value.

WHAT DRIVES IT

Schedule value grouped by client.

Multi Year Monthly Trend

WHAT IT SHOWS

Monthly spend with one line per year, plus a brush to zoom into a range.

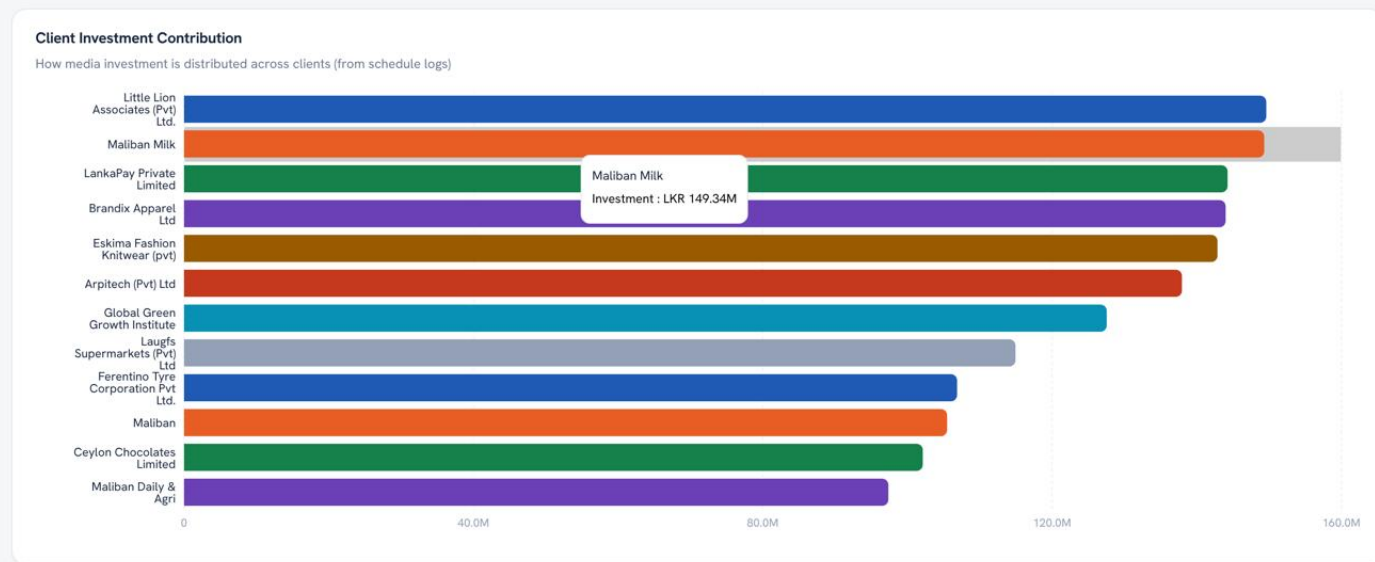

HOW TO READ IT

Overlay the years to compare seasonality. Drag the brush along the bottom to focus on a window.

WHAT DRIVES IT

Monthly spend under the active agency, client and channel filters.

Client Investment Contribution

WHAT IT SHOWS

Each client's contribution to total spend, as ranked horizontal bars.

HOW TO READ IT

The longest bars carry your portfolio. A short tail of small clients sits at the bottom.

WHAT DRIVES IT

Per client spend under the active filters.

Monthly Spend Trend

WHAT IT SHOWS

Spend on this single channel, one line per year on a Jan to Dec axis.

HOW TO READ IT

Compare the years for this channel. Click any point to open the schedules behind that month.

WHAT DRIVES IT

Schedule value on the selected channel, pivoted by year.

Spend by Agency Over Time

Spend by Agency Over Time

How much each agency spent on this channel, month by month

WHAT IT SHOWS

Monthly spend on this channel, split by agency.

HOW TO READ IT

See which agency drives this channel, and when their investment rises or falls.

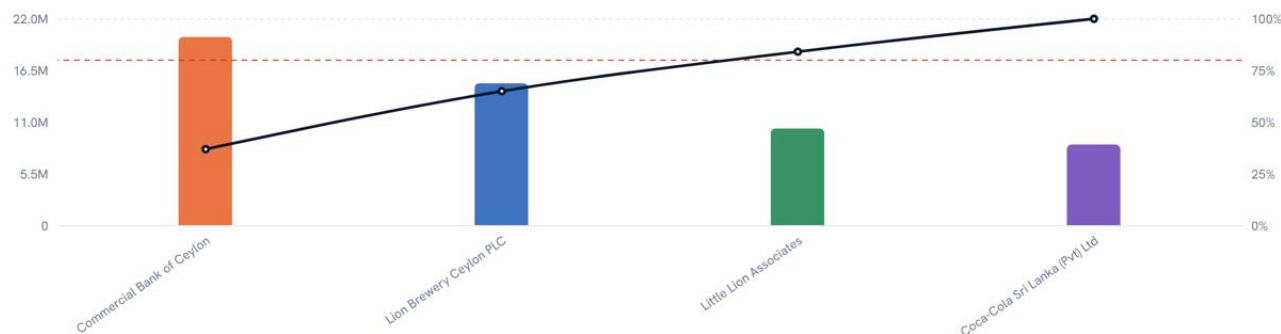

WHAT DRIVES IT

Channel spend grouped by agency and month.

Client Spend Concentration

Client Spend Concentration

Which clients drive this channel's spend. Bars are each client's spend, the line is the running share of the total (dashed = 80%)

WHAT IT SHOWS

A Pareto of the clients on this channel: bars plus a cumulative line and an 80 percent marker.

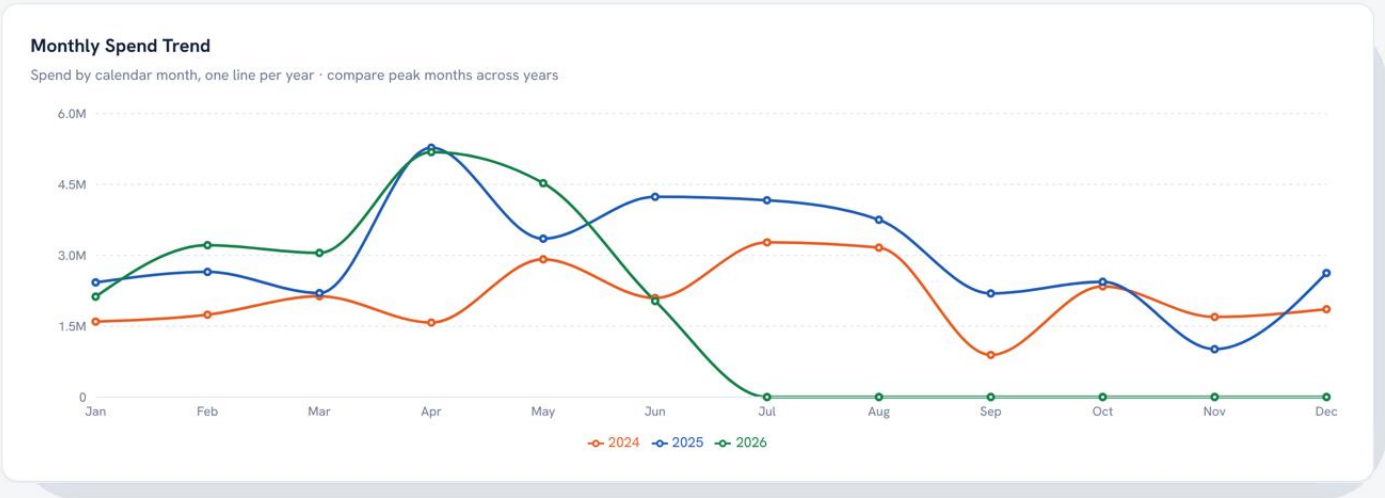

HOW TO READ IT

See whether a handful of clients account for most of the channel's spend.

WHAT DRIVES IT

Per client spend on this channel, sorted high to low.

Monthly Spend Trend

WHAT IT SHOWS

This client's spend, one line per year on a Jan to Dec axis.

HOW TO READ IT

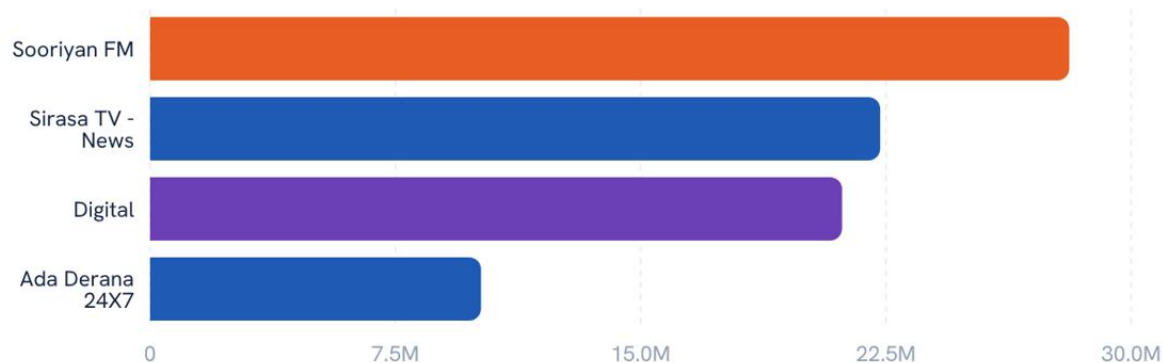

Compare the client's years side by side to read growth or slowdown.

WHAT DRIVES IT

The client's schedule value by month.

Spend by Channel

Spend by Channel (Top 12)

WHAT IT SHOWS

The client's top channels, ranked by spend.

HOW TO READ IT

The longest bar is where this client invests most of its budget.

WHAT DRIVES IT

The client's schedule value grouped by channel.

Medium Split

Medium Split

■ TV	LKR 32.45M	39.7%
■ RADIO	LKR 28.11M	34.4%
■ DIGITAL	LKR 21.16M	25.9%

WHAT IT SHOWS

A donut of this client's spend by medium.

HOW TO READ IT

The ring shows how the client balances TV, Radio, Print and Digital.

WHAT DRIVES IT

The client's schedule value grouped by medium.

Now every chart tells you something.

Open the Executive Dashboard, read the trend, split and ranking on each screen, and export a report whenever leadership asks. The data is always live and always yours to review.

Questions on any screen reach the media team through your admin.
